

'CO<sub>2</sub> Zero Travel' is the English name for 'CO<sub>2</sub> ゼロ旅行', and 'CO<sub>2</sub> ゼロ旅行' is a registered trademark of JTB Corp in Japan.

Turn travel CO<sub>2</sub> emissions to zero!

JTB: Pioneering Travel towards Sustainability  
Protecting the Earth while Traveling

# CO<sub>2</sub> Zero Travel

Leaving behind a more beautiful Earth for the future...  
Here at JTB, this is our fervent hope.  
Let's take action now to lessen the impact on our global environment.

## CO<sub>2</sub> Zero Travel is a travel program that utilizes the mechanism of carbon offsetting(\*).

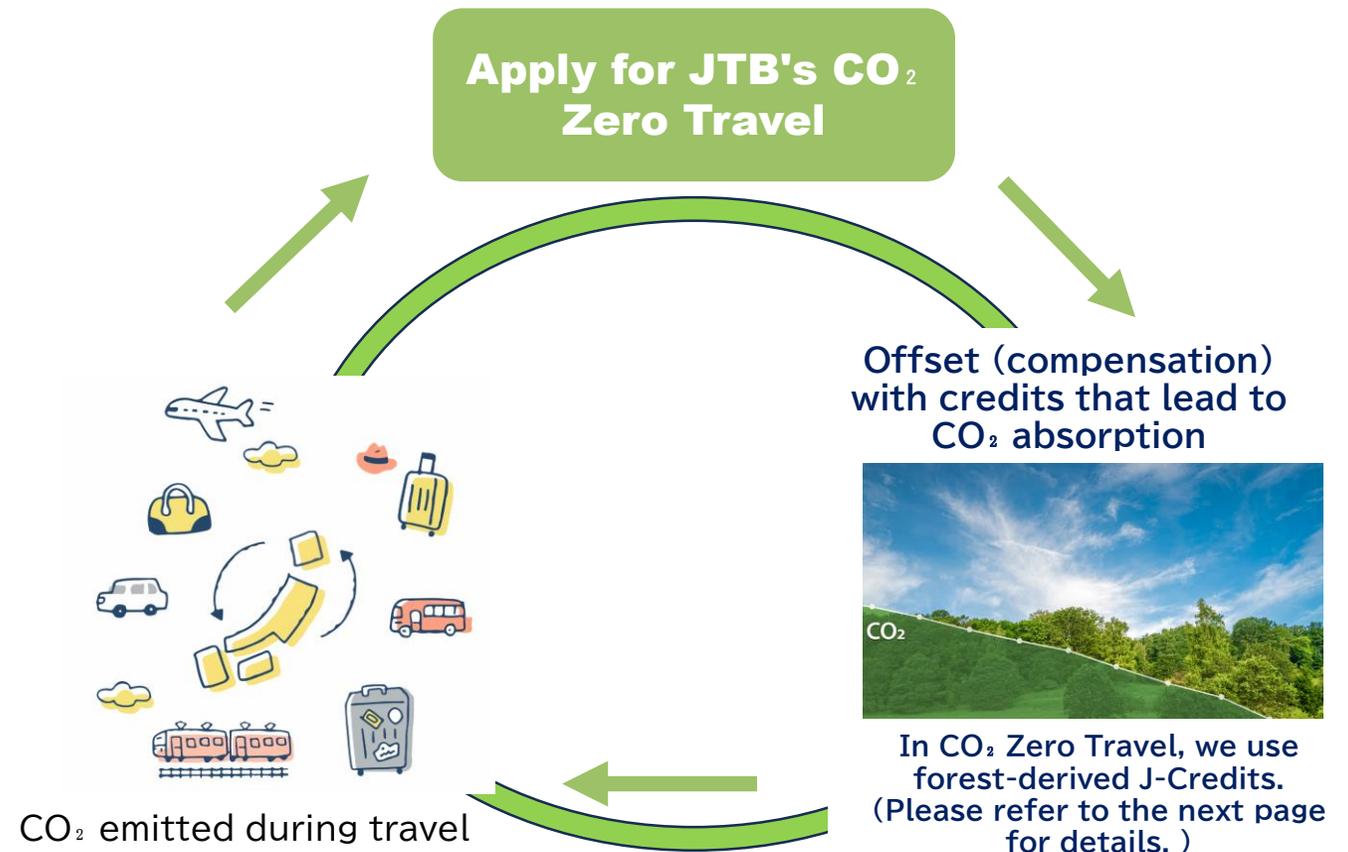

\*Carbon offset refers to the concept of compensating for the emissions of greenhouse gases (CO<sub>2</sub>, etc.) that are unavoidable in daily life and economic activities (after all efforts to reduce emissions have been made as much as possible) such as by investing in activities that reduce greenhouse gas emissions equivalent to the amount emitted.

### Carbon Offset Mechanism

- ✓ Add a partial cost to travel expenses
- ✓ Purchase "J-Credits" with that cost
- ✓ Indirectly offset CO<sub>2</sub> emissions during travel

(Reference: Ministry of the Environment "Carbon Offset Guidelines")

## What is J-Credit?

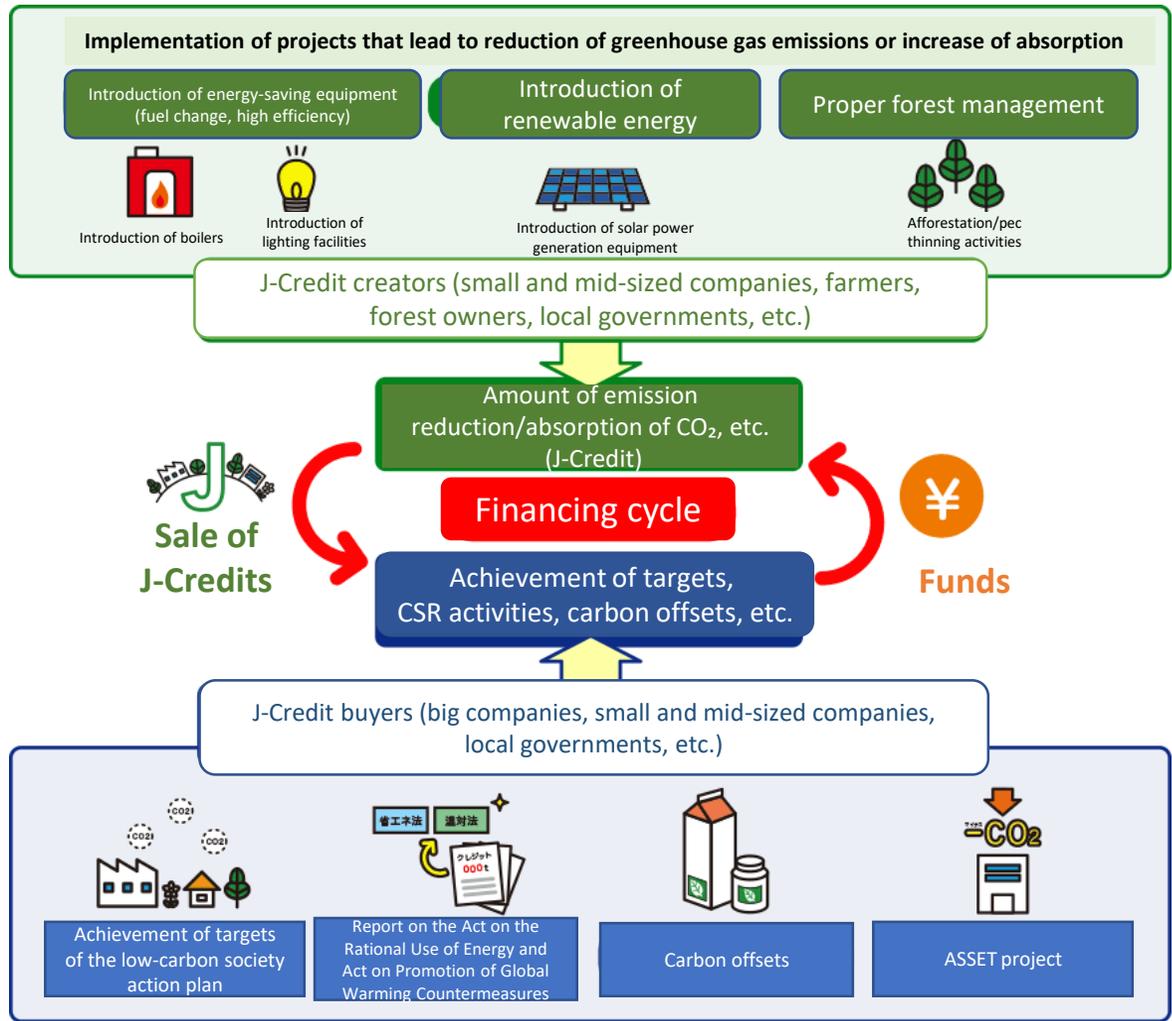

The J-Credit Scheme is a system in which the government certifies credits for projects such as CO<sub>2</sub> absorption through proper forest management, CO<sub>2</sub> emission reductions through the use of renewable energy, and the introduction of energy-saving equipment.

This system is operated by the government.

### Benefits of Using the J-Credit Scheme

- Initiatives for SDGs
- Initiatives for ISO 14068-1
- Initiatives for environmental consideration in CSR activities
- Initiatives following the GHG Protocol
- Initiatives for information disclosure based on the SHK system

\*Please note that this does not comply with SBT and cannot be used for reporting. (In SBT, J-Credits derived from renewable energy (electricity and heat) can be reported as renewable energy procurement amount, but credits from CO<sub>2</sub> Zero Travel® cannot be used for reporting.)

## About the Source of J-Credits

While the J-Credit Scheme offers various credits that contribute to CO<sub>2</sub> removal and reduction, JTB's CO<sub>2</sub> Zero Travel utilizes forest-derived J-Credits (see below).

### What are forest-derived credits?

Forest-derived credits are those certified by the government as credits for the amount of CO<sub>2</sub> absorbed through proper forest management, such as periodic thinning.

As continuous proper management (operations) of forests involves economic burdens, purchasing the credits generated through operations can lead to further operations.

In other words...

When companies promote CSR activities, they can convey that they are "supporting initiatives such as for forest conservation" instead of emitting greenhouse gases through travel.

In the ISO standard 14068-1, the pathway to carbon neutrality is divided into two phases, Early and Later.

While any type of credit can be used in the Early phase, only removal type (forest-derived, etc.) can be used in the Later phase.

### Early phase

Although emissions reduction and removal are being implemented according to the plan, there are still emissions that have not been reduced, and we are at the stage of offsetting those emissions using credits (regardless of type).

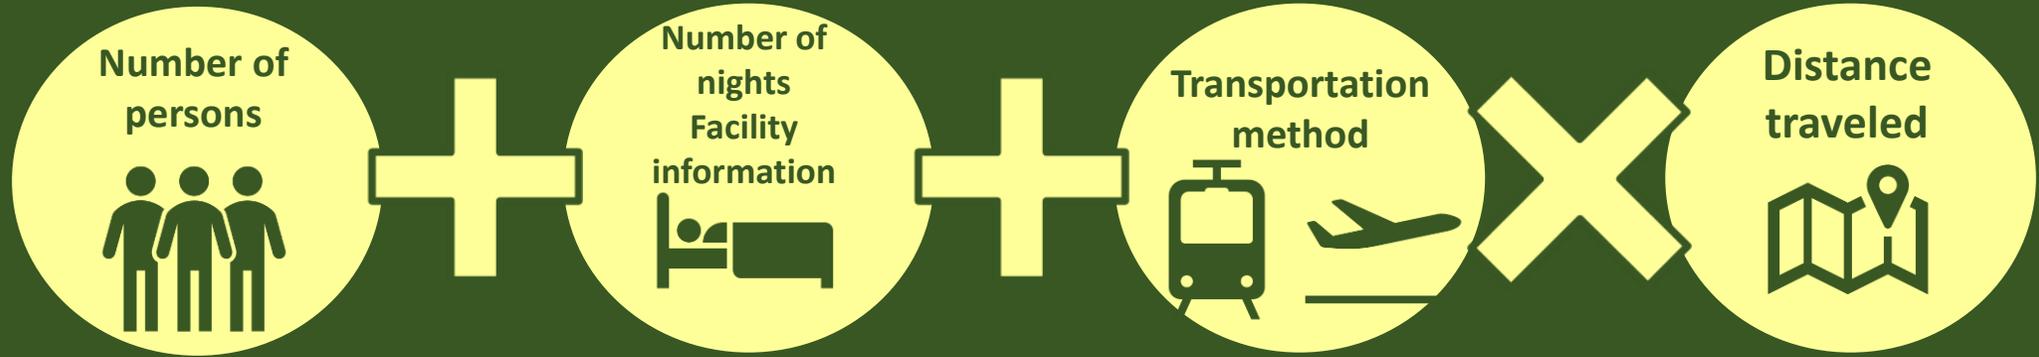

### Later phase

Only the emissions that cannot be reduced by emission reduction and removal remain, and this is the stage where those emissions are offset using removal credits (including cases where it is achieved solely through self-effort without offsetting).

## Information Required for Application

This is all the information needed!

### Calculation Method for Accommodation Section

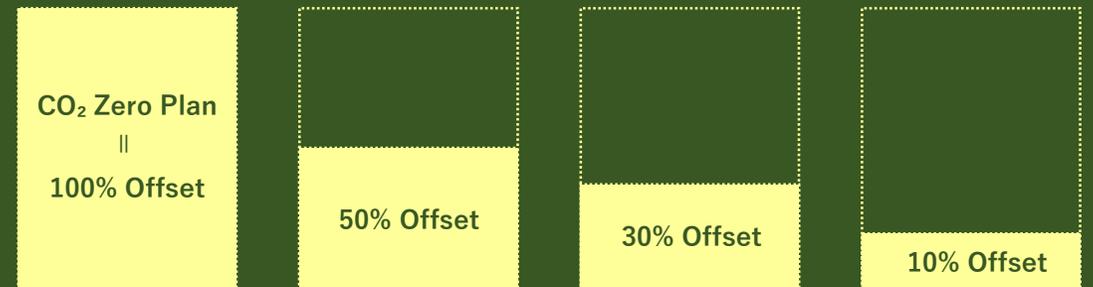

For the CO<sub>2</sub> generated from accommodation, only the 100% Offset Plan which offsets approx. 15kg of CO<sub>2</sub>\* per person per night is available.

(There are no 50%, 30%, and 10% plans.)

\*Based on the Ministry of the Environment's Emission Intensity Database, calculated using the average number of people entering a room among JTB gross sales.

### Calculation Method for Transportation Section

For the CO<sub>2</sub> generated from transportation, there are 4 plans to choose from based on the offset amount.

## Documents that can be provided to customers

### 《J-Credit Retirement Notification》

\*This is an official certificate proving that credits have been transferred to a retirement account.

### 《CO<sub>2</sub> Zero Travel Certificate》

\*This is an optional certificate issued by JTB. There is no official effect.

SAMPLE

GREENSHOES  
WORLDWIDE ECO TRAVEL

CO<sub>2</sub> Zero Travel

No.

The CO<sub>2</sub> emissions from transportation and accommodation in this tour will be offset using the "J-Credit Scheme", which is operated by Japan's government.

Estimated CO<sub>2</sub> emissions offset in this tour  
999 kg-CO<sub>2</sub>

Travel period  
3/1/2025~ 3/4/2025

Place of issuance of this certificate  
JTB Global Marketing & Travel Inc.

\* "CO<sub>2</sub> Zero Travel" is the English name for "CO<sub>2</sub> ゼロ旅行", and "CO<sub>2</sub> ゼロ旅行" is a registered trademark of JTB Corp in Japan.

Purchase Offset Amount (kg-CO <sub>2</sub> ) (Purchase Price)	Before Tour or Day of Tour 1 per person or 1 per group	After Tour
999 kg-CO <sub>2</sub> and below	CO <sub>2</sub> Zero Travel Certificate (Optional)	— (*1)
1,000 kg-CO <sub>2</sub> and above (= JPY 13,100 yen (tax incl.) or more)	CO <sub>2</sub> Zero Travel Certificate (Optional)	J-Credit Retirement Notification

(\*1) For those who would like to receive the J-Credit Retirement Notification for 999 kg-CO<sub>2</sub> and below, the purchase amount will be increased to 1,000 kg-CO<sub>2</sub> (JPY 13,100 yen (tax incl.)\*2).

(\*2) Includes a fee of JPY 1,100 (tax incl.) for issuing the J-Credit Retirement Notification.

## 《J-Credit Retirement Notification》

\*An official certificate proving that the purchased credits have been transferred to a retirement account.

### What does "retirement" mean?

- Retirement of credits refers to the completion of the transfer from the owner of the offset credits to the retirement account of the purchaser. As a result, it will be possible to prove that the indicated CO<sub>2</sub> amount has been reduced without the relevant credits being used twice.

### How to Use the J-Credit Retirement Notification

- Enhance corporate brand value and gain new fans as a company committed to reducing CO<sub>2</sub> through posting the J-Credit Retirement Notification on the home page and other platforms

- ESG measure = improve finance evaluation

- Proactive efforts towards SDGs such as promoting appeal within the company, promoting behavior change among employees, etc.

#### Account Holder Name

\*The name "JTB Communication Design, Inc." will be included in the retirement procedure.

#### Purchased Forest-derived Project Name

\*Example: Forest Management Activities in Town-owned Forests in ●● Town

#### Offset Amount (ton-CO<sub>2</sub>)

\*The CO<sub>2</sub> offset amount will be expressed in tons.

#### Usage

\*Usage: In CO<sub>2</sub> Zero Travel, it will be indicated as "Other."

#### Credit usage corporation, performance report year, usage period

\*The name of the customer who made the purchase, the reporting year, and the travel period will be indicated.

#### Purpose Details

\*The accommodation facility name, etc. will be indicated.
